

ECOSAN PRO V

Ecosan Pro V is a next-generation bio-safe formulation designed to combat and prevent a wide range of infectious diseases in poultry and livestock environments.

Powered by Quaternised Chitosan Nanoparticles (QCN) and fortified with 12+ potent herbal extracts, this innovative formula delivers dual benefits: effective disease control and enhanced immune support.

Benefits:

- Multi-Disease Protection Effectively manages common viral and bacterial outbreaks like CRD, ND, IBD, IB, and VVND.
- Safe for aerial disinfection, can be fogged directly in the presence of livestock, making it ideal for daily or routine biosecurity use.
- Boosts Immunity & Recovery.
- Supports faster recovery during outbreaks and enhances resistance in healthy birds.
- No Residue, No Withdrawal Period deal for commercial poultry and egg farms – ensures safety for consumption and export.
- Prophylactic & Therapeutic use helps both in preventing diseases and supporting ongoing treatment protocols.
- Supports Feed Efficiency & Growth.
- Improves feed conversion ratio (FCR), weight gain, and egg production.
- Eco-Friendly & Biodegradable.
- Safe for workers, animals, and the environment.

Usage & Application

Aerial Disinfection

- Dilution: Mix 10–20 ml of Ecosan Pro V per litre of clean water
- Method: Use ULV foggers, mist sprayers.
- When to Use:
 - Routine sanitation (every 2–3 days)
 - During outbreak situations (2–3 times daily)
 - Post-cleaning for thorough disinfection
- Water-Based Medication
- Dosage: 1–2 ml per litre of drinking water (adjust as per veterinary advice)
- Duration: 3–5 days for treatment; 2 days per week as a preventive routine

Ingredients That Matter (100% Natural)

- Quaternised Chitosan Nanoparticles (QCN) – advanced antimicrobial base
- Cissus quadrangularis – anti-inflammatory
- Azadirachta indica (Neem) – antiviral, antibacterial
- Cynodon dactylon (Durva) – immune booster
- Phyllanthus emblica (Amla) – antioxidant-rich
- Adhatoda vasica (Vasaka) – respiratory support
- Tinospora cordifolia (Giloy) – immunity enhancer
- Alpinia galanga – antimicrobial action
- Embelia ribes – intestinal health
- Phyllanthus niruri – liver protector
- Andrographis paniculata (Kalmegh) – detoxifying
- Terminalia chebula (Haritaki) – adaptogenic properties

Ideal Applications

- Commercial poultry farms (broilers, layers, breeders)
- Hatcheries
- Livestock sheds (dairy, goat, pig units)
- Biosecurity zones
- Veterinary hospital disinfection
- Quarantine facilities
- Organic and antibiotic-free farming operations
